

3.3 Taring

→ Place empty container on the balance.

→ The weight is displayed.

→ Tare: press the « $\rightarrow 0/T \leftarrow$ » key briefly.

→ Add weighing sample to container. The net weight is

If the container is removed from the balance, the tare weight is stored. The tare weight remains stored until the « $\rightarrow 0/T \leftarrow$ » key is pressed again.

Note

With METTLER TOLEDO DeltaRange balances (next Section), the tare weight increments is available again after every taring operation.
